

Phase II - Construction / Renovation & Gardening Tools UPDATE – June 23, 2015

Since the release of the Construction/Renovation and Gardening tool lists back in April 2015, Call2Recycle Canada, Inc. has received considerable feedback from members raising concerns with identifying the 120+ products contained in these two lists within their IT systems.

In response to these concerns, Call2Recycle Canada, Inc. set out to streamline the implementation of batteries sold as components in Quebec. Working in conjunction with the Retail Council of Canada and a sub-committee of affected members, Call2Recycle Canada, Inc. has adjusted its preferred approach to covered batteries sold as components to the following eleven sub-categories:

Construction/Renovation tools	Gardening Tools
<ol style="list-style-type: none"> 1. Sanding/Polishing tools 2. Air Inflator/Pumps 3. Battery Test/Charging Equipment (automotive only) 4. Drills/Screwdrivers 5. Saws (battery operated only) 6. Spray Guns 	<ol style="list-style-type: none"> 1. Chain Saws 2. Garden Shears/Trimmers 3. Garden Sprayers/Insect Foggers 4. Lawns Blowers/Vacuums 5. Stick Edgers

Per the published schedule of fees and the membership agreement, an environmental fee of \$0.24 would need to be applied per battery and remitted to Call2Recycle Canada, Inc. on a quarterly basis. Below please find a decision tree to assist with the identification of these items.
